/// 800/900 SERIES BALE BED

powered by
/// HARPER INDUSTRIES, INC.

VERSATILE. DEPENDABLE. DEWEZE.

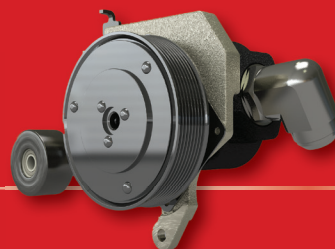

Since 1984, we've been trusted with one of the most important chores on the ranch — feeding your livestock. It's a job we don't take lightly because it's the one you depend on most. That's why we've continued to refine our bale beds with new features, options and styling to meet the changing needs and preferences of today's producers. We're confident in the durability, performance, design and convenience of the latest 800/900 Series Bale Beds. So much so that we've put the DewEze name on it. **After all, we have a legacy to uphold...and so do you.**

DewEze || THE DIFFERENCE IS IN THE DETAILS

- » **DURABILITY:** Our beds are built tough and coated with a superior GatorHyde protective lining.
- » **CONVENIENCE:** A standard wireless remote makes operation easier than ever.
- » **PERFORMANCE:** An exclusive direct linkage design provides true down pressure for consistent bale unrolling in float mode.
- » **EXPERIENCE:** This isn't our first rodeo. We've been in the business of making bale beds for more than four decades.

A bale bed is only as good as the hydraulics that power it. That's why we manufacture our own systems in house, like the industry-leading **DewEze Engine-Driven PTO Kits**, designed to deliver smooth performance with the ideal flow, pressure and power you need. We also offer electric-over-hydraulic solutions.

/// DewEze Hydraulics

Removable spikes with an optional underbed storage kit — save time picking bales out of a line, then store out of the way for hauling or feeding.

/// Greater Versatility

OTHER ACCESSORIES

- » **Spike Storage**
- » **Across-The-Bed Toolbox**
- » **Headache Rack Work Lights**
- » **Lift Bar**
- » **Underbody Front and Rear Toolboxes**
- » **Medium/Tall Headache Rack**

- » **Tie Down Loops**
- » **2.5" Receiver Hitch**
- » **Improved Greasable Pins**
- » **Redesigned Tailboard**

This popular DewEze XRM feature allows you to hydraulically extend the arms an additional 20 inches — ideal for placing bales into hay rings or lifting bulky equipment for added reach and control.

/// Extendable Arms

/// Pivot Squeeze

Arms open from 34 to 100 inches wide.

/// Parallel Squeeze

Arms open from 41 to 90 inches wide.
