**LOAD.
HAUL.
AND
UNWIND.**

A REEL IMPROVEMENT IN SAFETY & EFFICIENCY

Designed specifically to meet the needs of utility professionals, the **XRT Bed** features reinforced arms, durable construction and a large lift capacity to load and transport some of the heaviest reels without a trailer. This self-loading material management solution offers one-man operation and helps decrease downtime between jobsites.

It's not just efficient — it's also safe. Specialized variable-speed hydraulic controls allow one man to easily load, unload, take up or payout cable or wire with peace of mind.

And because it's from DewEze, the XRT Bed is backed by Decades of Durability™.

Risers & Reel Bar*

A pair of risers, dual lift cylinders and an arbor allows the XRT Bed to easily load reels.

Spindle System*

The hydraulically controlled arms, reaching from 26 to 55 inches, eliminate the need for an arbor to get a grip on a range of spools.

Overspin Brake

(Available with Spindle System Only)

An integrated brake with up to 500 pounds of drag helps prevent backlashing while pulling.

Hydraulic Controls

(Available with Spindle System Only)

Reduce manpower to safely take up or payout cable or fiber hydraulically with this variable speed, removable accessory.

Go Wireless

Hydraulic power at the touch of a button. The DewEze wireless remote gives you untethered control within a twenty foot radius of your bed.

*The XRT Bed can be ordered with either the spindle system or risers and reel bar.

ACCESSORIES:

Transport on One Less Axle

Hauling reels on an XRT Bed saves you the time, money and hassle of hauling them on a trailer.

Do More With Your Truck

The synchronized-squeeze arms form a clean flatbed when not hauling reels. For added versatility, rub rails are included to use as tie-down points.

Work Safely & Efficiently

The hydraulic controls of the XRT Bed allow one man to safely and reliably take up or payout fiber or cable.

Lift up to 5,500 Pounds*

Reinforced 4x4 load arms on the XRT Bed lift up to 5,500 pounds. The bed includes a quarter-inch-thick landing pad over Gatorhyde lining for added durability when working with heavy reels.

*Do not exceed GVWR

Toolbox Storage

Stow and tow with under/above body and across-the-bed storage to keep your equipment organized and safe.

Tool Circuit

Maximize your hydraulic system's productivity by simply tapping into the bed's tool circuit for a versatile power solution.

Work Lights

Don't get caught in the dark — plug and play a fixed or swing light kit to light the way for a safer work environment.

Dump Box

Extend the versatility of your XRT bed by adding a dump box to haul and dump dirt, sand or other material.

Since 1968, DewEze has built a reputation by providing our customers with the highest quality equipment, made by skilled craftsmen in America's Heartland. Our experienced dealer network ensures your success with after-sales service and support with dozens of locations nationwide better to serve you.
